Port Harcourt Township,
Rivers State, Nigeria.

Presenting

Federal Coastal Fishery Terminal

The Coastal Terminal, as it is more popularly known (Federal Coastal Fisheries Terminal Borokiri) is strategically located along Kolokuma Street, off Harold Wilson Drive, Borokiri, Port Harcourt, Rivers State. Kolokuma Street is a left turn off Harold Wilson Drive which takes its source from Churchill Road by Captain Amangala Junction and terminates at New Road by the Nigerian Navy Base, NNS Akaso. The southern flanks of the renewed city of Port Harbour, Rivers State (the Oil & Gas Hub of Nigeria). The terminal sits in its pride, as one of the nearest hubs to most offshore facilities and one of the largest jetty/terminals in the state, with facilities comparably. It is less than an hour to Bonny Island by water, its proximity to Onne and NPA Ports.

The terminal sits on approximately 2.6 hectares of land, with a Berthing space of more than 190sqmeters. It features 80meters length Slipway, prominently for repair and maintenance of Vessels. Additionally, it houses storage facilities for both water and AGO, (a 1.5million litre capacity Tank Farm for AGO and other petroleum products and another 1.5million litre capacity tank for Water), increasing its utility quotient for the client. Further facilities include: a loading and Off-loading facilities for Berthed vessels; Cold Room facilities; a Dry Dock, as well as Warehouse; and Office facilities.

The Coastal Terminal, Borikiri presents a one-stop shop for all Jetty related activities.

We present to you a more detailed brief on the value - added services we can bring to your business operations.

Strategic Location

Ideally located in the heart of Rivers State's oil & gas hub, with easy access to major ports and offshore facilities.

Modern Infrastructure

Well-equipped jetty and facilities designed to support efficient marine and industrial operations.

Storage Facilities

Integrated tank farm and storage solutions for water, AGO and petroleum products.

One-stop Solution

Comprehensive services and facilities for all jetty related activities under one roof.

Our Services

Berthing Services

Dry Dock Facilities

Shipyards Services

Cold-room Facility

Tank Farms

Logistics Hub

Lightering And Loading/off- Loading Services

Water Supply

Our Services

We provide world-class marine and logistics solutions tailored to meet the needs of our clients with safety, efficiency and reliability.

Berthing Services

Berthing facilities to Fishing Boats, Ships, Barges, Tugs and other floating Marine Vessels/Equipment. The facility can berth vessels between the ranges of 50 – 100 tons.

Dry Dock Facilities

Dry Dock facility that enables for a holistic repairs/maintenance/certification of vessels or examination of the integrity of the Hull. This facility can handle vessels within 50-110 tons. This service becomes of signal importance, especially, as Dry Dock Certification for all Marine Vessels is taken more seriously by the Regulators (NIMASA, NIWA, and NPA) at this time.

Shipyards Services

The terminal also accommodates a Ship/Boat building facility as part of its many utilities. Construction from start to project completion of Marine Vessels are undertaken, as well as, Repairs, Fabrications and Upgrades.

Cold-room Facility

Three (3) Functional Cold-Room Storage units, each one with the capacity of 150,000kg, providing a combined capacity of 450,000kg for preserving large quantity of items in cold storage until they are ready for shipment/delivery. This service can be very useful to fishing trawlers, as well as other cold sea going vessels for instance.

The Borokiri terminal also houses an industrial Ice-Block making machine for production of ice blocks.

Tank Farms

The terminal possesses two (2) Tank Farms with a combined capacity of 1.5million litres for storage of petroleum products in a safe and non-hazardous manner, under the operating system of the Management. A good metering system ensures accountability.

Logistics Hub

Most suitable for use as a Logistics Hub.
The terminal offers:

- ✓ Offices;
- ✓ Warehousing;
- ✓ Outdoor Stacking;
- ✓ Parking spaces and facilities.

This service becomes more critical due to strategic location and closeness to Bonny (the LNG Train 7 project location) and other offshore arenas.

Lightering And Loading/Off- Loading Services

We provide a conducive environment for Lightering services between Marine Vessels at our terminal. We also facilitate Off-loading of domestic products.

Water Supply

We provide water to Marine Vessels at our Jetty. This service is a 24-Hour operation and is facilitated by a 1.5million litre tank storage.
